

RMM series

Product Pictures

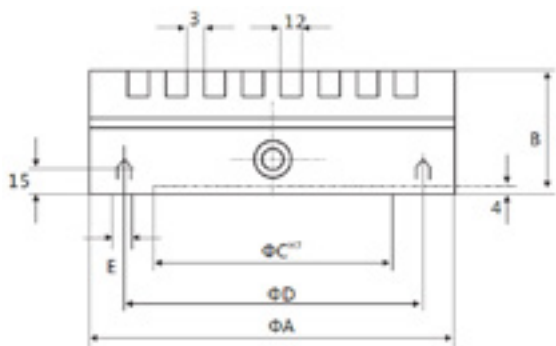

Description

- Powerful round permanent magnetic chuck

Application

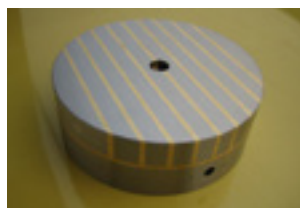

- For heavy cutting and carbon alloy process
- Suitable for workpieces that are difficult to clamp

The Brief Drawing

Features

- Extremely Strong holding force combined with slim construction
- With coolant and water proof structure
- Can be switched ON or OFF by hand lever
- Nominal holding force: 150 N/cm²
- Magnetic field depth: 10mm
- Pole plate wearing limit: 5mm
- Pole pitch: steel 12mm, brass 3mm
- Pole pitch 4+15 mm can be produced
- Center hole and concentric rings could be machined for positional guide.
